PROFESSIONAL SUMMARY

Discipline-driven 3rd-year Computer Science student at Osmania University with a strong focus on building secure, data-driven web applications. Demonstrated ability to develop end-to-end solutions, from database schema design to responsive frontend implementation. Seeking an internship to leverage skills in Cybersecurity, Frontend Development, or Data Analysis within a high-performing engineering team.

EDUCATION

University College of Engineering, Osmania University | *Hyderabad, Telangana State Bachelor of Technology in Computer Science and Engineering* | **Expected May 2027**

- **Status:** 3rd Year (Current)
 - **Relevant Coursework:** Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Operating Systems, Software Engineering, Discrete Mathematics.
-

TECHNICAL SKILLS

- **Languages:** Python, Java (OOP), JavaScript (ES6+), C/C++, SQL (MySQL), PHP
 - **Frontend:** React, HTML5, CSS3, SCSS, Bootstrap 4, jQuery
 - **Backend & Data:** Node.js, Express, MySQL Database Design, Data Visualization (Chart.js)
 - **Tools & Security:** Git/GitHub, Docker, Linux (Bash), Kali Linux (Nmap, Wireshark, Metasploit)
-

TECHNICAL PROJECTS

Student Attendance Management System | *Full-Stack Development & Data* | [GitHub Link](#)

- **Architecture:** Developed a multi-role (Admin/Teacher/Student) management system using PHP and MySQL, featuring secure authentication and Role-Based Access Control (RBAC).
- **Frontend & UX:** Engineered a responsive dashboard using Bootstrap 4 and SCSS, ensuring cross-device compatibility for mobile use in classrooms.
- **Data Insight:** Integrated Chart.js to visualize attendance trends, allowing administrators to identify absenteeism patterns through automated analytical reports.
- **Security:** Implemented server-side validation and prepared SQL statements to mitigate common vulnerabilities like SQL Injection.

Real-Time Messaging Platform | *Backend & Network* | [GitHub Link](#)

- Built a real-time social messenger using PHP and AJAX, focusing on low-latency message delivery and asynchronous database updates.
- Managed end-to-end user lifecycle including secure registration, profile management, and session handling.

Python CLI Task Manager (v2 & v3) | *Python, Colorama, File I/O* | [GitHub Link](#)

- **Evolutionary Development:** Architected three progressive iterations of a CLI tool, transitioning from basic CRUD operations to a feature-rich system with priority-based sorting and persistent file storage.
 - **System Design:** Engineered a custom data parsing engine using Python's datetime and file handling to maintain state across sessions with a "tasks.txt" flat-file database.
 - **UX/UI Engineering:** Leveraged the Colorama library to build a color-coded terminal interface, improving data readability through conditional formatting (e.g., Red for High Priority).
 - **Code Quality:** Implemented robust input validation and error handling to ensure system stability, demonstrating a focus on "Quality and Discipline."
-

EXPERIENCE & ACHIEVEMENTS

- **ISRO / National Remote Sensing Centre (NRSC):** Selected for an academic visit to study satellite data processing and the technical architecture of the Chandrayaan missions.
- **Open Source:** Actively maintaining a repository for a GSoC 2026 target project, demonstrating consistent version control habits and documentation skills.
